

MAURER Xtended Power Tower Earthquake

Xtended – a new dimension in rides

More than up and down: Earthquake

Xtended

Our current Xtended Rides:

- Xtended Roller Coaster
- Xtended Spinning Coaster
- Xtended Coaster Tower
- Xtended Power Tower
- Xtended Robo Tower
- Xtended Water Rides

The tower shakes ...

Just imagine: you are riding upwards, enjoying the scenery with a mixture of joy and excitement when suddenly a tremor goes through the tower. It starts to shake, the seats begin to tilt and the next second you find yourself plummeting towards the ground; a dull rumble, thunder and lightning, the lights go out. The MAURER Xtended Power Tower Earthquake is the first vertical ride worldwide to offer effects similar to an earthquake, which can be controlled. Combined with the already unrivalled Xtended variety of ride variations and seat tilting, the result is a vertical ride packed with potential for incorporating the ride experience into an exiting story.

Xtended Power Tower Earthquake

- A world first designed for maximum fun
- The tremor goes through the entire tower
- A particularly sensational ride when adding the unique 30° tilting of the seats
- Acoustic and visual effects to intensify the sensations of horror
- Entertainment for the whole family and for all age groups: Earthquake Effects are optional on every ride
- Maximum variety thanks to new surprises throughout the entire ride
- Endless theming possibilities
- Uniquely different effects on every ride
- Unique attraction for every park
- New safety concept developed with TÜV
- Exceptionally high quality standards
